

## Circle Pyramid Pop Through Mini Kits tutorial

Hi everyone!

Here's a set of Circle Pyramid Pop Through Mini Kits, shabby chic designs each with a different pyramid subject. Each kit contains two sheets; the card base with pyramid layers and the card insert with gift tag and sentiment tags. The finished item is a square card, approx. 14 cm (5.5 inches) in size, with a circular pyramid built up on the insert which is presented through the circular opening in the card front. The back of the card has a panel on which you can write your personal message.

To make your card:

- 1) print both sheets onto your favourite good quality card or photo paper
- 2) cut out all of the elements
- 3) take the card insert and cut out the white circle from the centre on the left hand side
- 4) take the card base and carefully remove the matching circular centre, which also includes your first layer of pyramid
- 5) trim the white edge off this first pyramid layer
- 6) fold and score the card base and card insert. Carefully line them up and stick together. At this point I sometimes like to attach a ribbon between the two pieces, before finally sealing. Then I also attach the sentiment to the ribbon. There are some pics of finished cards below which illustrate this.
- 7) build up your pyramid on the card insert, carefully lining up the matching images. There are up to seven levels of pyramid. You can use them all or just those you want to. I like the depth, but delicacy, obtained with all of the layers on 1mm foam pads.
- 8) add your sentiment to the card by sticking the sentiment tag back and front together, attaching to your ribbon if you want to. There is an extra blank sentiment tag so that you can add your own words

I hope you like these designs and have fun with them!

Best wishes
