

3D Rubber Band Pop Up Cards

Fabulous keepsake cards that are simple to make but look so stunning when made up and will WOW the recipient.

For best results print sheets 1 to 3 onto photo paper or good quality cardstock and sheets 5 & 6 onto good quality paper. For a pretty lining print sheet 4 onto the reverse of sheets 5 & 6

3D Rubber Band Pop Up Cards

Before cutting out score each of the fold lines as per these diagrams.

Follow the extra diagram on the left for the fold lines on sheet 1

Note the red partial score lines.

Cut on the blue lines.

Fold and crease all the score lines using a bone folder.

Punch small holes where marked on sheets 2 & 3

The inside back from sheet one will look like this when you have scored and folded as above

Turn over and add adhesive in the area where marked in red on the photo, but make sure not to add any to the back of the pop out pieces

3D Rubber Band Pop Up Cards

Take the outer back from sheet 2 and mountain fold on all the score lines

Turn over and adhere the inner back in place, making sure the top edges are aligned and the right and left edges line up with the score lines on the reverse of the outer back

Pull the pop up pieces out and add adhesive to the front of them, where marked in red on the photo

Adhere the pop up layer to the the pop up pieces, making sure it sits centrally and is aligned along the bottom edge

Your card will now look like this from the front

3D Rubber Band Pop Up Cards

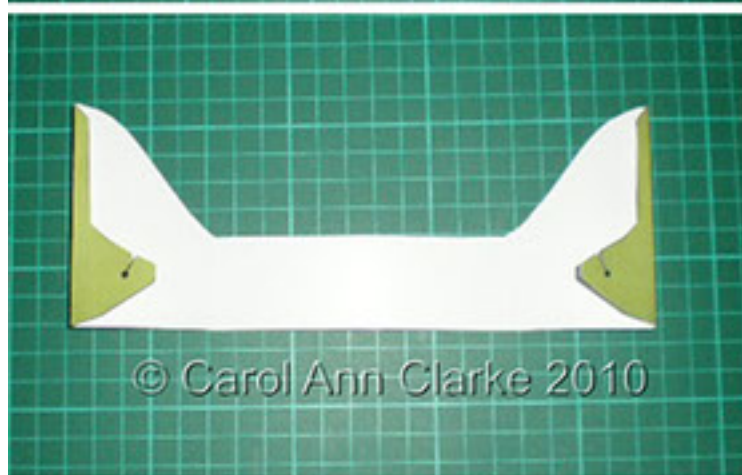

Your card will now look like this from the side, with the pop up layer only attached to the pop up pieces and sitting slightly back from the front of the layer below it

Push upwards on the pop up layer so it and the layer below it folds along it's central score line. Fold in the tabs at the side along the score lines.

Add adhesive where shown in red on the photo, making sure not to put any over the cut line or the small punched holes. Do not remove the carrier tape yet.

Take the front layer from sheet one, turn over and fold in the tabs along the score lines

Align and adhere on the left hand side, making sure the side and bottom edges are aligned.

3D Rubber Band Pop Up Cards

Fold the front open, note that the hook for the rubber band and the flap will be free within the card.

Add adhesive to the flap marked in red on the photo.

Fold the front over and adhere the top of the middle section of the front to the adhesive we added above. The fold line of the flap will align with the top of the middle section of the front. (the reverse of the edge marked in red on the photo)

Open the right hand section of the front and remove the carrier tape from the area we added adhesive to earlier (marked in red on the photo)

Fold the front back down making sure that all edges are aligned.

Please note - the front section is adhered in these 3 stages to make it easier to make sure that all edges are aligned correctly

3D Rubber Band Pop Up Cards

It is easier to add the decoupage to the front layer now before installing the rubber band mechanism. As the decoupage is separate you can choose what and where to add it, or make it differently every time

Add the rubber band slipping it onto the hooks in the base of your card. I used thin shirring elastic in black so you can see it in the photo. Make sure the elastic is just long enough so it doesn't stretch when the card is opened but will stretch on collapsing the card. My elastic measured approx 5.5 inch in width (doubled) before installing it. Adding a twist to

the band will allow you to fine tune it

Gently press on the front of your card until it is fully folded and flat and will slip into it's matching envelope. I printed the coordinating backing paper onto the reverse of my envelope for a pretty lining

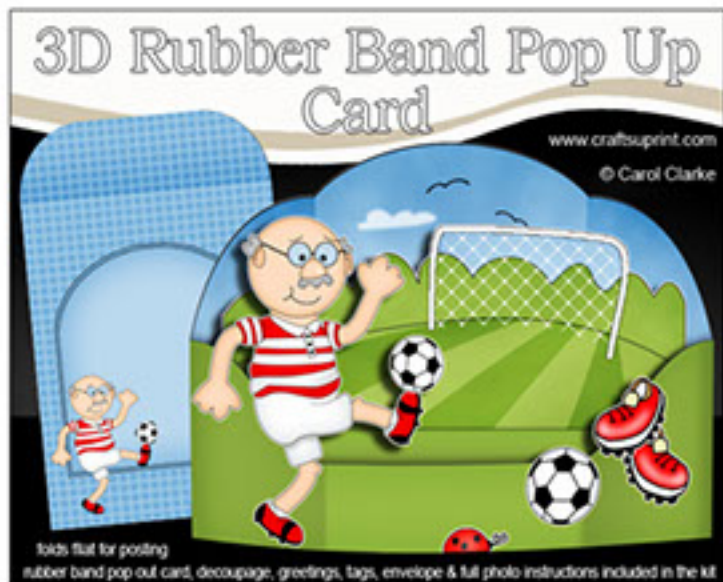

3D Rubber Band Pop Up Cards

Your Finished Card will gently pop up into place as soon as it's removed from it's matching envelope, revealing a card with a real WOW factor and lots of depth that will really stand out from the crowd!

I added a tag and beads hung from a bow onto the back of my card
