

Instructions

Card can be made in 2 ways; as a regular DL card or as a “Z” shaped DL card.

To make as a regular DL card just cut “part 2” file – (the Happy Birthday and Best Wishes greetings are included in “part 1” file) and fold in the normal way

To make a Z shaped DL card cut both Part 1 and Part 2 files and fold as in picture below ie Part 1 file mountain fold and Part 2 file valley fold, overlap

blank parts of card and stick (when sticking suggest keep folded and butt end of card up against fold of the next to get a neat result and to ensure one card doesn’t interfere with the fold of the next..)

Card can then be folded flat.

There is also a Filigree Framed Foliage mat of the design that can be used separately. This file has an optional “backing” which can also be optionally used on the cards above as in bottom left card in main picture
