

## How to make an Armchair Easel Card

1. Print out the main card and decoupage pages onto good quality card. (I used glossy photo card).
2. Print out the envelope pieces onto paper.
3. Cut out all the pieces.
4. Score along the fold lines.
5. Use double sided tape to stick your envelope together. Leave the non-stick layer on the flap until you need to close the envelope.
6. Stick the back panel for the greeting onto the centre panel at the back, so that it will be the correct way up when the card is folded. (Most of the designs don't have a "right side up" as there is no text on them.)
7. Layer up the decoupage using foam pads or silicone glue. (I used foam pads).
8. Stick the figure with the seat pad attached onto the armchair before you add the arms of the armchair. This will hide the sides of the seat cushion. Then stick your armchair with character onto your card.
9. Decide where you want to put the footstool, which also acts as the "stopper" and stick in place using thick foam pads (or brown wooden beads would make realistic looking stool legs!)
10. Add any extra embellishments you like to personalise your card.
