

## How to make a 7x7 inch diagonal front card with decoupage

This card can be made by missing out some of the pieces if you want a less complicated card, so have a look at the pieces on the screen before printing them out.

These instructions show how to use ALL the pieces, read the instructions so you know if you want to miss any out.

1. Print out all the pieces you want to use onto good quality white card or photo paper. The inside front, back and decoupage layers are optional, depending how much you want to add to your card.

Here are all the pieces for the PINK HAT KIT

Photo 2

2. Score along the A to B line marked on your card front and fold. Stick the flap behind the left side edge of the card middle. ( see photo 2).

The card middle can be used turned either way round (in most cards but not all eg golf or fishing card can only go one way) depending on where you want your sentiment label. You can put the label in the middle of the card or the corner, try it before you stick the pieces together.

3. Stick on the card back. This is optional, you could use a plain piece of card instead but you do need to cover it with either the card back in the kit or a piece of card to cover the folded over piece from the card front with the writing on it.

4. Stick on the inside front, (see photo 3), this is also optional as you can just leave it blank so you can write on it.

5. Curl the edges of the decoupage pieces using either a ball tool (shown in photo 4 ) by placing the piece you want to curl face down in the palm of your hand and rubbing around the edge with the ball tool or a small spoon.

Photo 5 – decoupage layers

6. Layer the decoupage pieces (see photo 5) in place using sticky foam pads or silicone glue.

See completed card in photo 6

I hope you enjoy making it.
