

# Shell Front Card Mini Kits

## Instructions

designed by **Mary MacBean** exclusively for [www.craftsuprint.com](http://www.craftsuprint.com)

**An 8" square card blank is required for this design**

Print the 2 sheets onto medium to heavy weight card or photo paper. Cut out all pieces

Using double sided sticky tape or glue, attach the card front to your blank card, lining up the left hand edge with the fold of the card

Trim away the white card at the right hand side, making the scalloped shell edge.

Trim away any white along the top and bottom edges. This is easier to do if you fold the card in half and use the card front as a guide

Using double sided sticky tape or glue, attach the insert to the inside of the card, lining up the left hand edge with the fold in the card. Trim away any white card to the right hand side of the insert

Using sticky pads or silicone glue for extra dimension, build up the decoupage layers on the front of the card starting with the largest piece and building up to the smallest, ensuring that the design matches.

To finish the card attach one of the included sentiments or use the blank tag for your own message.
