

One Sheet Swivel Card Tutorial

These cards are really easy and quite quick to make. There are Duo (with decoupage), Trio and Quad versions.

I recommend that for best results, 220gsm card is used.

You will also need two brads for a Duo card, three for a Trio and four for a Quad design.

1. Cut out the layers.
2. Take the largest one and place the next size down centrally and upside down on large layer. (When you swivel the text will be turning the other way up.)
3. Pierce a hole through both layers about 75mm from edge of smaller layer.
4. Insert brad.
5. Open up and repeat with next smallest layer. (Again, design on top layer will be upside down at this point.)
6. Pierce and insert brad.
7. If you have a Quad design, repeat again for the last piece.
8. Open up and attach card (or fabric) ribbon with final brad, or glue if preferred.
9. Swivel card to close and open.

I hope you like them.

Best wishes
Christine Crowther

Here are pics of some of my finished designs, showing the cards open and closed:
