

5" x 7" Card Toppers with Easicut 3D Decoupage

lovely 5 x 7 designs that can be personalised with a name or greeting.
These ready to use 5 x 7 card fronts come with with an easy to cut 3d
step by step decoupage topper.

For best results print sheets onto photo paper or good quality cardstock.

5" x 7" Card Toppers with Easicut

3D Decoupage

Cut out all the elements on the sheet. With these easicut sheets you can choose how to cut the design out. I chose to leave some of the background in and remove other bits. You could leave it all in or fussy cut it all out if you wish.

Adhere the base layer to a card blank. I like to use a slightly larger card blank made by scoring and folding an A4 sheet in half and leaving a small border by trimming to fit but you could also trim to the edge of the design if you wish.

Add the decoupage layer using foam tape or silicone glue to add dimension. If you'd like to add further layers of decoupage then you could print the sheet out again.

Matching insert sheets are also available.
