

## 3D Rubber Band Pop Ups

Fabulous keepsake cards that are simple to make but look so stunning when made up and will WOW the recipient.

For best results print sheets 1 to 3 onto photo paper or good quality cardstock and sheets 6 & 7 onto good quality paper. For a pretty lining print sheet 4 or 5 onto the reverse of sheets 6 & 7. If wished sheet 4 can be printed onto the reverse of sheets 1, 2 & 3 so there are no white bits showing on the inside of your lovely card.

# 3D Rubber Band Pop Ups

Read these instructions all the way through before making your card

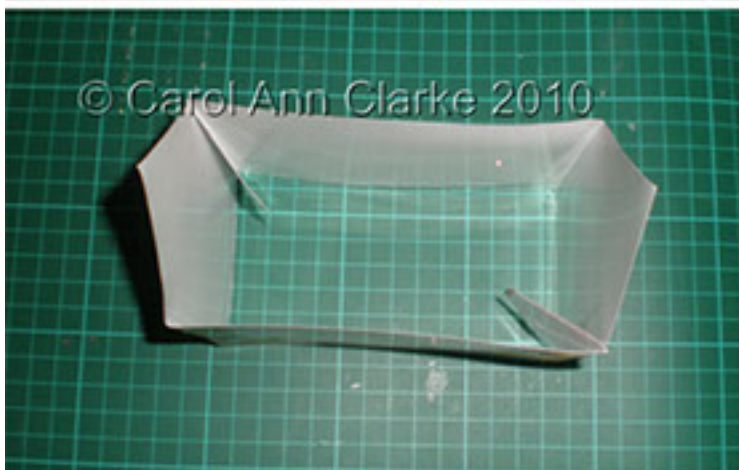

Before cutting out use a ruler and scoring tool to score the fold lines on sheets where marked. Use the lines at the edges of the sheets to align your ruler

Take the pieces from sheet 1 & 2. Add double sided tape to one of the pieces where marked in red on the photo making sure you avoid the hole and elastic slot

Fold in all 4 tabs, Line up and adhere the 2 pieces together.

Your card will now look like this from above, with the 2 tabs on the inside of your card

## 3D Rubber Band Pop Ups

Take the roof support, fold and crease as shown in the photo with 1 triangular piece coming forward and the other backwards. Add adhesive to the front of triangle marked by the black arrow and to the back of the triangle marked by the red arrow on the photo

Add the roof support to the card as shown in the photo. The red and black arrows show where the same triangles from the above photos are adhered.

Add adhesive to the flap as marked in red on the photo. Note the small black line.

The elastic hooks are to right front and left back

Add the roof centrally to the roof flap.

I find the following way the easiest to make sure it is in exactly the right place

Take the roof and turn over. Mark the centre point at the fold. This will be at 3".

I have marked where this is with the red arrow on the photo

Flatten the card and turn over so the back is showing. fold over the small flap with adhesive we added above.

# 3D Rubber Band Pop Ups

fold over the small flap on the roof support with adhesive we added earlier

Line up the two small marks. I have marked where these are with the black arrows on the photo

Fold over the small flap on the roof support so it adheres to the underside of the roof

Open up the roof to the front and back

## 3D Rubber Band Pop Ups

Your card will now look like this from the front with the roof lifted up

Your card will now look like this when squared up

It's easiest to add the decoupage and greetings now whilst you can still flatten the card without the rubber band trying to pop it up for you! lol

Don't add too much depth to the decoupage as you still want your card to fit into it's matching envelope. There are window boxes and flowers plus a small amount of extra decoupage to add to the front with the greetings

Add elastic to the hooks inside. Make sure that the elastic is just long enough to be unstretched when the card is popped up.

I used black shirring elastic so you can see where it is. I found the best length was 4.5" when doubled to the knot.

To fine tune/shorten the elastic add a twist (as below)

To close your card squish it with the elastic band running left to right. Gently start to fold in the 2 base pieces. Your card will try to resist ... that's the pop up mechanism working lol

## 3D Rubber Band Pop Ups

A personal greeting can be written on the writing panel on the back

Make up the envelope as per the instructions on the sheets
