

Instructions

Cut **front and back of card**; mountain fold inner score lines and valley fold outer score lines

Cut **Frame overlay** on **Frame Pattern pdf** (ie print on card and use to cut design)

Cut **Insert** in vellum (I used pale blue vellum in picture)

Cut 4 photo corners from **photo corners** file

Print **Lady pdf** (use actual size in pdf print dialogue) and cut rectangle around one of them by hand (there's a whole sheet but just need one 😊)

Mount cut out lady in middle of back panel using photo corners

Stick front and back of card together by side panels at same time sandwiching vellum insert in between (make sure don't get glue on vellum where it shows through)

Stick **Frame overlay** to front of card around frame aperture

{for cricut design space users intended dimensions of main card is 285.90 mm x 136.15mm and everything else in proportion – no svgs import into cricut design space at correct native dimensions in my experience..}

IF DON'T WANT TO USE VELLUM CAN CUT **ALTERNATIVE BACK OF CARD** (IE ONE WITHOUT SIDE DESIGN), AND THEN CUT INSERTS IN OPAQUE CARD (OR JUST USE DIFFERENT COLOUR BACK OF CARD IE LEAVING OFF INSERTS), FOR CONTRAST
