

3D Cute Critter Boxes

For best results print sheets 1 & 2 onto photo paper or good quality cardstock. Print sheet 3 onto the reverse of sheets 1 & 2

3D Cute Critter Boxes

Read these instructions all the way through before making your box

These scoring diagrams will show you exactly where the score lines & cut lines for your box are on each sheet. There are also score lines on the wings that are not shown on the scoring diagrams

Before cutting out use a ruler and scoring tool to score the fold lines on sheets where marked. Use the lines at the edges of the sheets to align your ruler.

Also score the lines on the wings. cut the **AQUA** lines on sheets 1 & 2 as shown on the diagram.

Mountain fold the **RED** lines as shown on the diagrams

Fold and crease all the score lines using a bone folder.

Add dst to the flaps where shown in **BLUE** on the diagrams, and also to the flaps on the wings.

Please Note - I didn't print the backing paper onto the reverse to make it easier for you to see what I'm doing. There are photos on pages 1 & 4 of the tutorial showing how the box looks with the backing paper printed onto the reverse

Join sheets 1 & 2 together

Turn over and join the remaining side together

3D Cute Critter Boxes

Refold your box so the top is uppermost and add one of the wings aligning along an imaginary line from the front to the back along the centre of the box top

Add the second wing alongside the 1st. Run your bone folder along the folds of the wings to ensure your wings 'fly' at the right angle.

My box now looks like this from the side

Fold in the front and back flaps. The small cut lines will 'engage' with the flaps to ensure your box stays shut

My box now looks like this from the front

As I didn't print the backing paper on the reverse you can clearly see how the wings are attached

3D Cute Critter Boxes

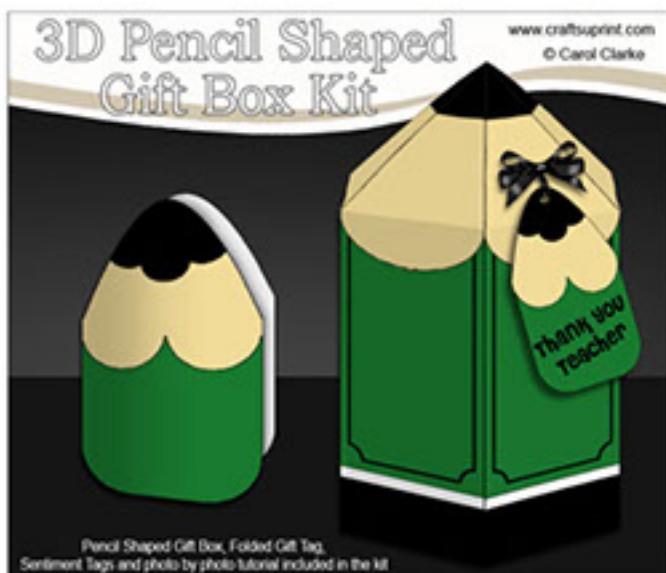

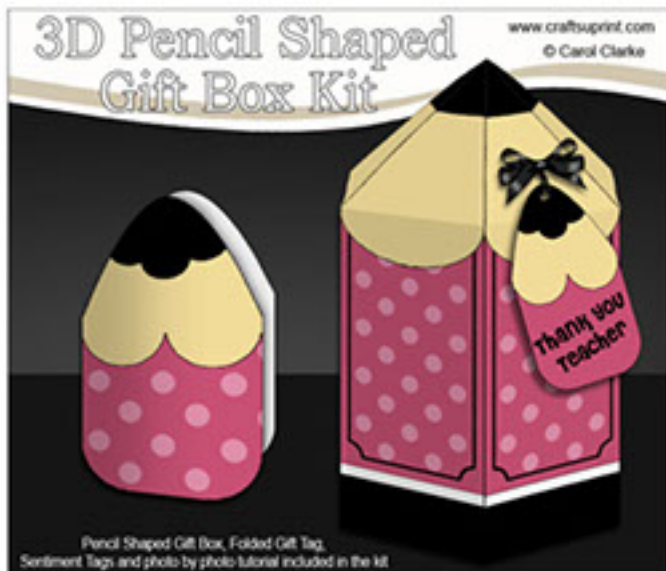

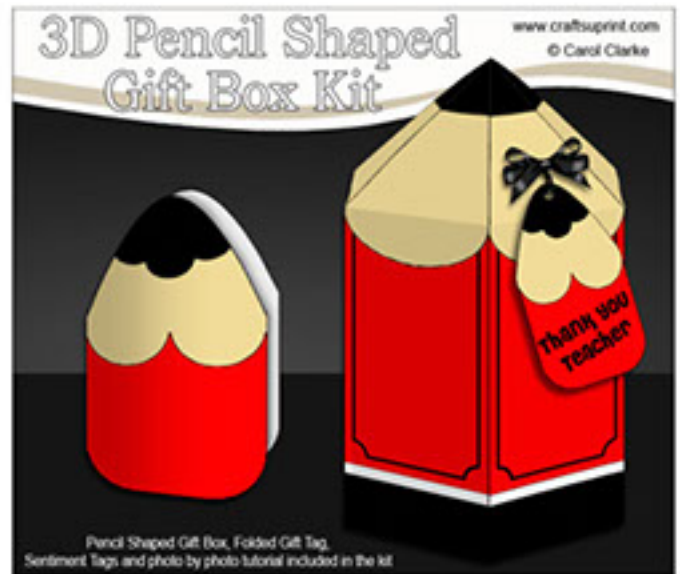

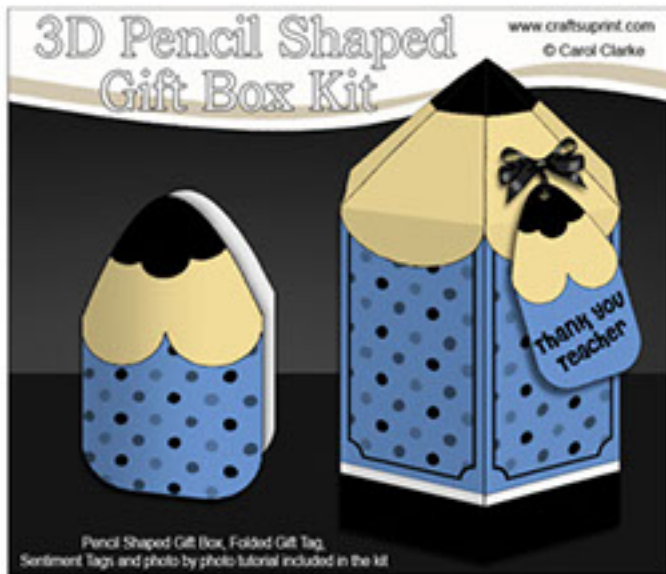

These photos show how great your box will look when made up after printing the backing paper on the reverse!
