

## Butterfly 2 way Cards

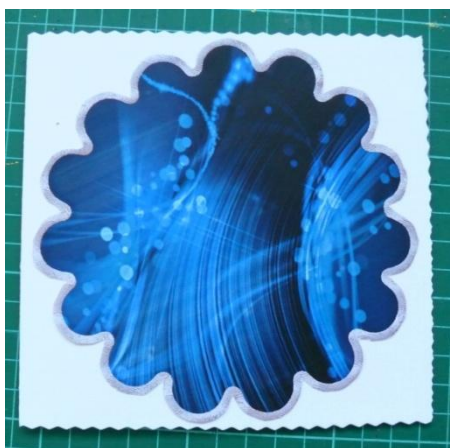

These designs in my '2way' butterfly designs can be made up as rocker cards or toppers on a conventional card. Quick and easy to make but will look beautiful whichever way you make them up.

Firstly cut out all the pieces.

If you are going to make a rocker card, fold the 'base' in half with a mountain fold and score gently with a bone folder.

If you are going to make a conventional card, glue the base onto your card with the glue of your choice.

Then for both cards, use the decoupage pieces and place on the base. I use the small double sided pads. Use all layers or just the ones you want finishing with the single butterfly.

Then embellish how you wish. (Some people may prefer to do this before assembling the card)

Thank You for purchasing and I hope you will look at all the designs in this collection. Happy Crafting ☺
