

Fairy Pyramage Toppers Tutorial

By SuzieQ Kuttables Sold Exclusively at Craftsuprint.com

After cutting out all the parts lay them out so you can easily see the largest to the smallest layers.

In the example to the left I put the base part on a piece of card stock and found a banner to see what it would look like. Card stock and banner not included.

Assemble starting with the largest piece. I used double stick tape as the padded tape made this too tall.

Using tweezers hold layer 1 over the card, careful to notice the orientation of the fairy. As you add each additional layer be careful to notice that all points are lined up before attaching it to the next layer.

Using tweezers gives you a better view of all the points to line up.
