

HOW TO MAKE WANDA'S TWIST AND POP CARDS

I Have included backing papers that you can use to print on the reverse of the BASE, MECHANISM AND POP UP PANELS. This is optional

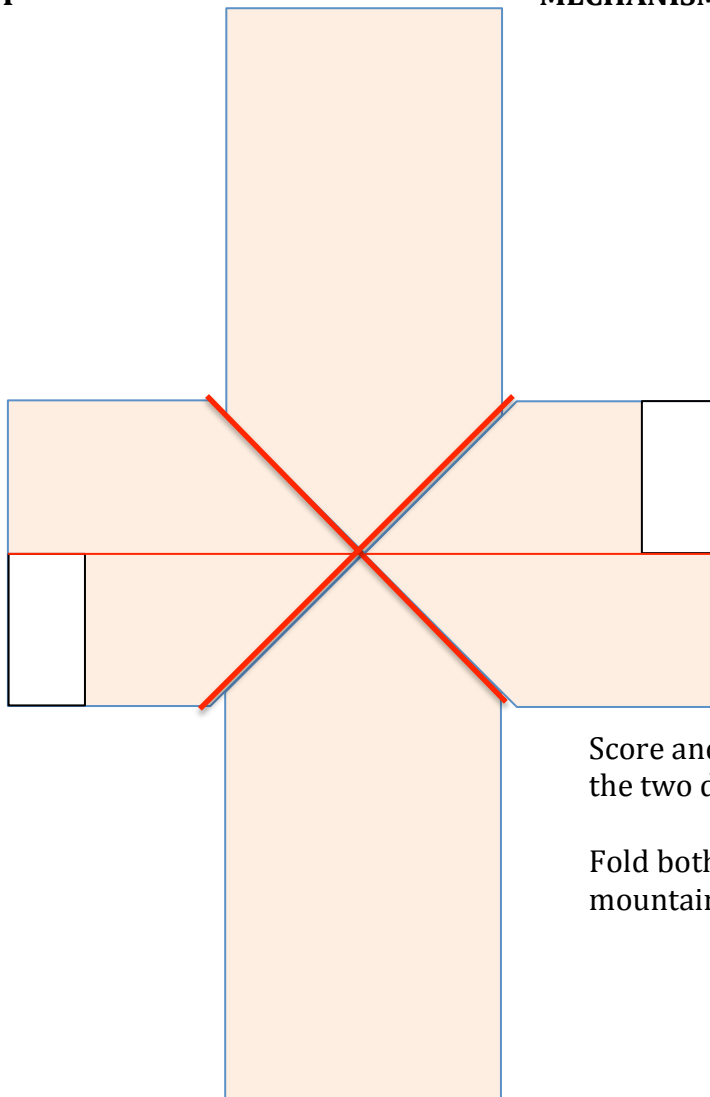

Personally I used 210 g paper for the base, mechanism and panels. Perfectly adequate for the job in hand.

BASE

Score and valley fold (white sides together) down the centre of the card

POP UP

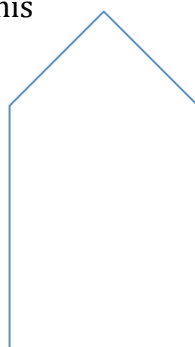

MECHANISM

Score and fold the central line and the two diagonals ALL IN RED.

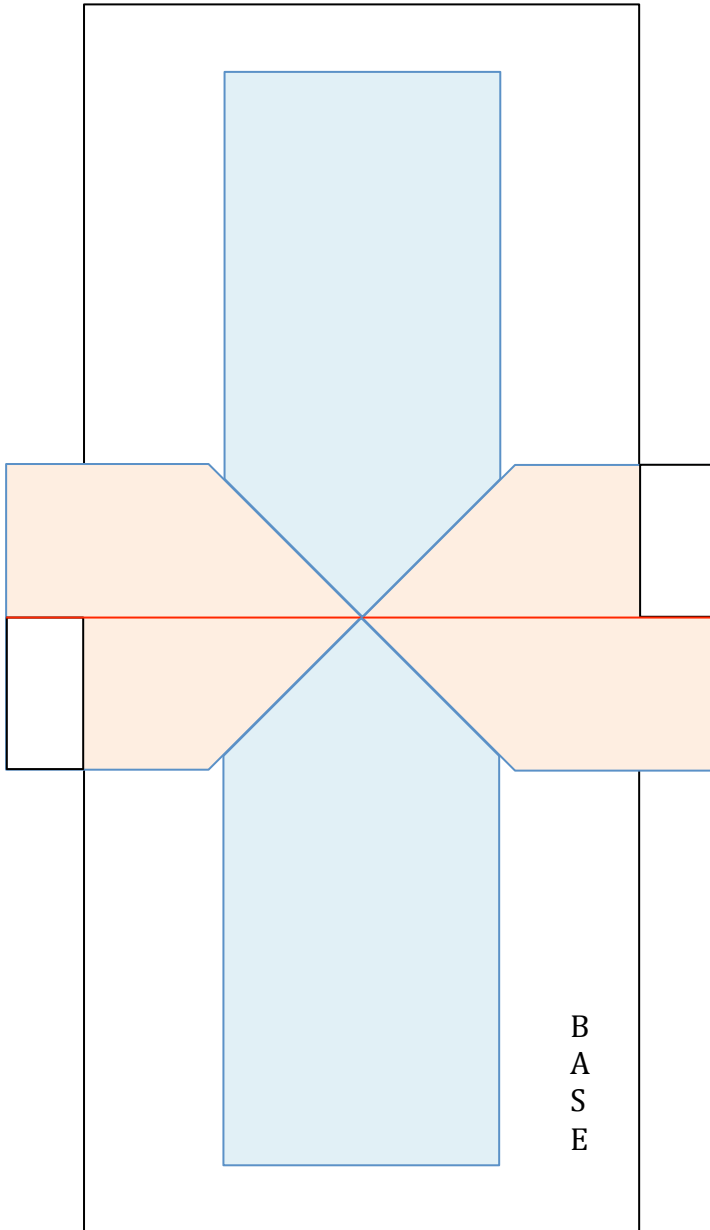

Fold both ways (valley and mountain and burnish the folds

Encourage it to form this

... the horizontal line will MOUNTAIN fold and the Diagonals will valley fold.

Fold and unfold several times to teach the piece what you expect it to do !!!

Put glue on reverse of parts marked in blue.

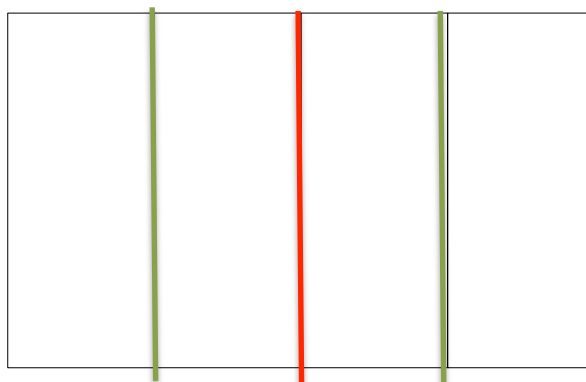

Align the central fold with the central fold on the card base.

Check the card mechanism still folds and glue in place.

NB The sides of the base will line up perfectly with the INSIDE of the white rectangles.

A
S
E

PANELS

VALLEY FOLD between panels ¹1 & 2 and 3 & 4

MOUNTAIN FOLD between panels 2 & 3

PUT STRONG DST over the WHITE RECTANGLES.

Centre the panels over the central fold and fix in place.

Add decoupage and tags.

Sit back and ENJOY your creation.
