### Line Art Design – Foil Valentine

There is so much more you can do with a line art design. This design was specifically created for a valentine. Or it could be an elegant wedding thank you card. The possibilities are endless.

The pieces can be cutout of cardstock or metallic vinyl and glued to a base. Or it can be treated as a layered cut where each layer reveal a color from the layer(s) below. It can be a foil lined or foil filled sketch.

In this example the design was completely foiled.

I used a We R Memory Keepers Foil Quill set with my cameo machine. Check with your machine for instructions on how to foil.
