

First cut all of your pieces out and lay them out.

Then assemble the face and ears whilst the box is still flat the black oval goes behind the face cut out

Then add the nose and cheeks

Next place the pink inner ears over the ears on the box and lay the white outer ears over the top

You can then add the egg and arms if you wish just under the head whilst the box is still flat

The feet are two pieces each lay the white over the pink

Then you can assemble the box by glueing the tabs and folding and sticking the box into shape. Add your feet and fill with treats!
