

Box Card by Sue Way

A new and exciting kind of card! This box card is so easy to make, but so different too. The card folds flat for posting and when its opened up it looks like a gift box with a character popping out of the top!

There are 2 gift tags one has a greeting and the other is left blank for your own message. Then there are a few elements to layer up & finish your card. Simply print onto card & follow the simple instructions on the sheet:

***Cut out all pieces & keep the instructions handy.**

***Write the letters on the reverse of each piece with pencil so you can rub out later.**

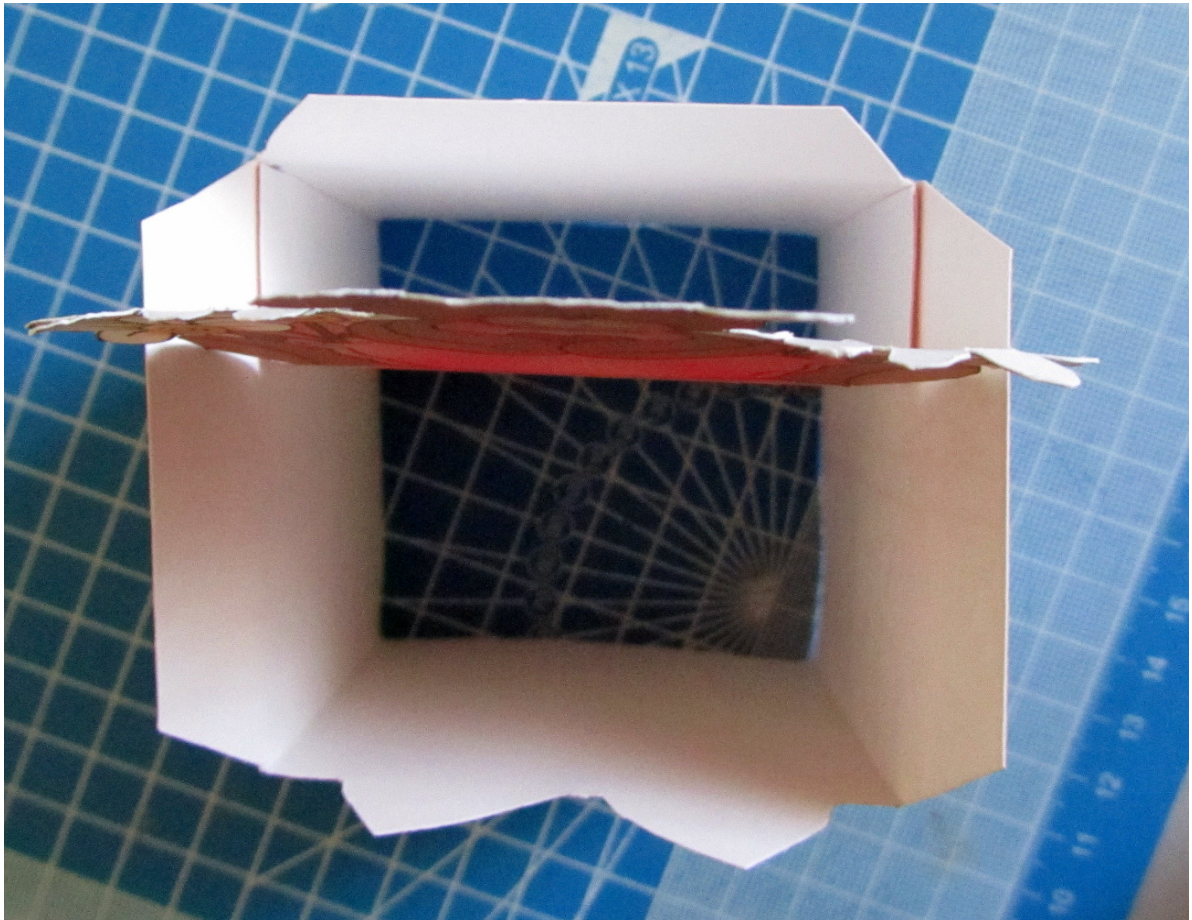

Score along all lines. Stick tab A to back of tab C:

Attach tab B to back of panel D to make inner box shape:

Attach panel E to tab C. Top view:

Layer up decoupage elements & embellish as required, I have added gold glitter to the flowers.

Folds flat for posting.

Thank you for looking. Click my name to see all the Box Card designs!
