Place the back layer face up on top, line up and stick down.

Open up and use either glue or double side tape on the small flap on the back of the card. Fold back down and stick in place.

Your card will now stand up.

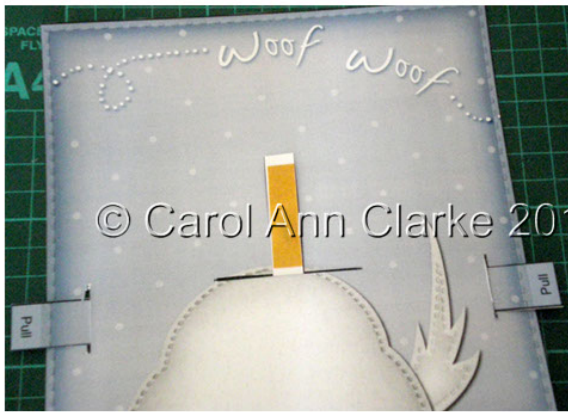

Choose a greetings sentiment and add to the back of your card

Add double sided tape to the front panel of the card. I've added one in each corner but you could add more but make sure they don't interfere with the animation mechanism.

Make up the animation mechanism and front panel according to the instructions in your kit and attach in place using thin foam pads

Add double sided tape to the top part of the animation bar on the front panel you made earlier. You can add it above and below or over the brad but make sure it doesn't go below the slot on the front panel.

Add the head to the animation bar sticking firmly in place and the completed front panel to the front of the card using the the foam pads and attach in place.

Add any decoupage layers. Stick the paws, hands, hooves etc in place making sure they lie flat at the top and don't interfere with the animation mechanism

Your finished card

A gentle push or pull on the animation bar will allow the decoupage to animate and move!

To ring the changes you could use the card without the animation layer, or together with the decoupage layers for a different look

Print the matching envelope that is also included in the kit onto good quality paper. Make up using glue or double sided tape to secure the flaps.

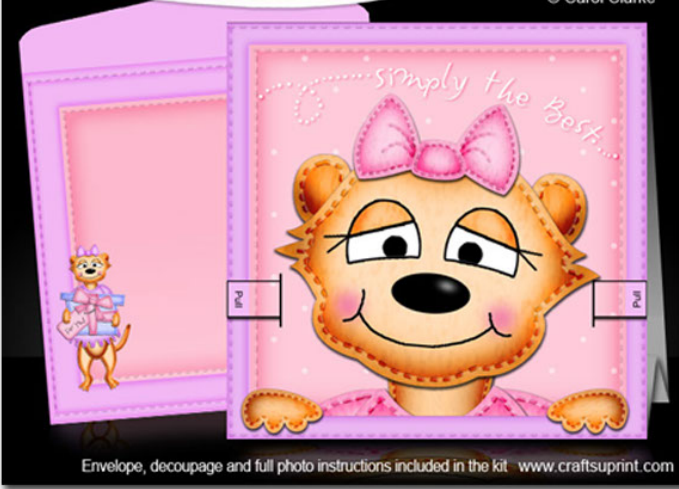

Your card will fold flat and is now ready to be sent

Punch a hole in one of the remaining greetings sentiments, add ribbon and use as a matching gift tag
