

# 3D Pop Up Front Cards

Fabulous Pop Up Cards where the Pop up is on the front!! ... and they're really easy to make too!

For best results print sheets 1 to 4 onto photo paper or good quality cardstock and sheets 5 and 6 onto good quality paper

## 3D Pop Up Front Cards

Print all the sheets.

Before cutting out use a ruler and scoring tool to score the fold lines on the card front and card back on sheets 1 and 2.

Also score the score lines where marked for the pop out boxes on sheet 4.

Cut out all pieces, but do not cut the cut lines on the pop out box yet as this is easier to do later.

Take the card front and fold up on the bottom score line. Crease using a bone folder.

Add double sided tape or glue and adhere the Card Front Cover from sheet 3, lining up the edges.

## 3D Pop Up Front Cards

Take the card back and turn over.  
Fold up on the first score line

Fold down on the next score line.  
and up on the last score line.

Give a good press with a bone folder to make the folds nice and sharp.

Your card back will now look like a W when viewed from the side

Add double sided tape on the small glue flap and above the top score line, I have marked these in red on the photo

Take the Card front and adhere to the back. Bend ever so slightly against the top score line to allow the card front/back to open and stand

## 3D Pop Up Front Cards

Your card will now look like the left photo when closed and the right photo when viewed from the side

Fold and crease all the score lines on the pop up boxes

Add double sided tape to the glue flaps, where shown in red on the photo.

Turn over, fold in the glue flap and fold the pop up box in half adhering to the double sided tape.

Your pop up boxes will now look like a tube from the side. Cut along the lines on the 2nd pop up box.

Squash the long pop up box and add double sided tape to 2 adjoining sides, where marked in red on the photo.

## 3D Pop Up Front Cards

Refold the pop up box so you have one side with double sided tape on the top and one on the bottom. Adhere it against the fold on the opened card front. I have marked in red where the top double sided tape is and the bottom one is underneath this.

Fold the back of the card forward and press down to adhere the top double sided tape in place against the card front.

Your card will now look like the left photo from the front and the right photo from the side.

## 3D Pop Up Front Cards

Take the larger pop up layer and turn over and adhere pop up boxes towards the top. Add double sided tape to the opposite side of the pop up boxes where marked in red. These will be marked in red on all the next few photos too.

Squash the pop up box on the card front flat and add double sided tape to the lower side where marked in blue on the following few photos. This will be the front of the pop up box when it's standing up.

Place the larger pop up face down lining up the base with the edge of the pop up box, where marked in black in the following photos.

Squash the pop up boxes on the larger pop up layer in the direction of the arrows. i.e. towards the front of the card.

Fold the back of the card forward and press down to adhere the double sided tape on the pop up layer to the card front and the card front to the larger pop up layer.

## 3D Pop Up Front Cards

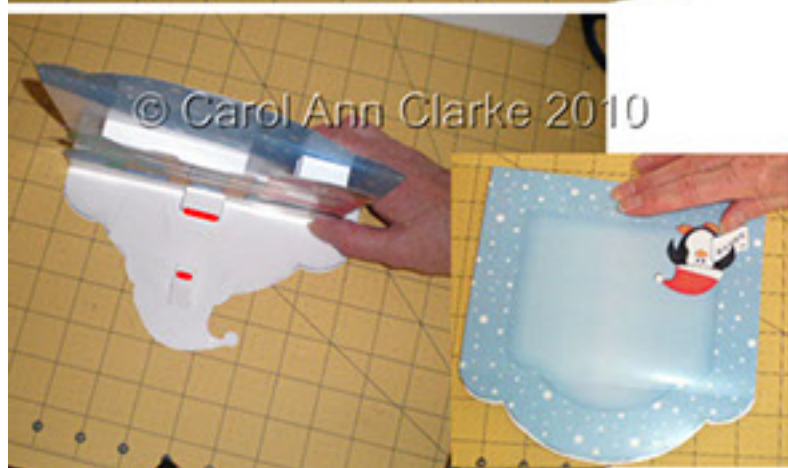

Your card will now look like the left hand photo when folded from the front, and like the right hand photo when open and from the side.

Do the same to add the smaller pop up layers using the appropriate sized pop up boxes and adhering the bottom one to the 1st pop up layer. Using double sided tape where marked in red on the following photos.

Add a pop up box towards the top of the reverse side of the pop up layer and add double sided tape to the opposite side of it. Squash the box in the direction of the arrows. i.e. towards the card front. Line up the base of the layer with the edge of the 1st pop up layer.

Fold the back of the card forward and press down to adhere the double sided tape on the 2nd pop up layer to the front of the 1st pop up layer and the pop up box.

## 3D Pop Up Front Cards

Add the remaining pop up layers in the same way. You can choose which you want to add and where to place them.

There are a number of greetings and sentiments in the kits and you can add these to the front or back

or to both!

Your card is now completed and will fold flat for posting

# 3D Pop Up Front Cards

Make up the envelope according to the instructions on the sheet

**\*\*Have Fun\*\***
