## How to fold and assemble the new Off-Set Gatefold Cards:

1. First print out all of the sheets included in the kit.
2. Now cut out all of the pieces.
3. Taking the Card Front Panel and the Card Back Panel score all of the fold lines.
4. Now, making sure that the folds will line up correctly, glue the blank sides of the two sheets together. I printed my card back piece on photo paper, and the card inside panel on regular printer paper to make it easier to fold, and also to make the card less bulky).
5. Now mountain fold both of the long lines so that the middle printed panel is on the inside of your card.
6. Mountain fold both of the triangle lines. Make sure to crease your fold well so that the card will stay closed.
7. Now you can add all of the decoupage and pyramid layers and elements… AND YOUR CARD IS DONE!
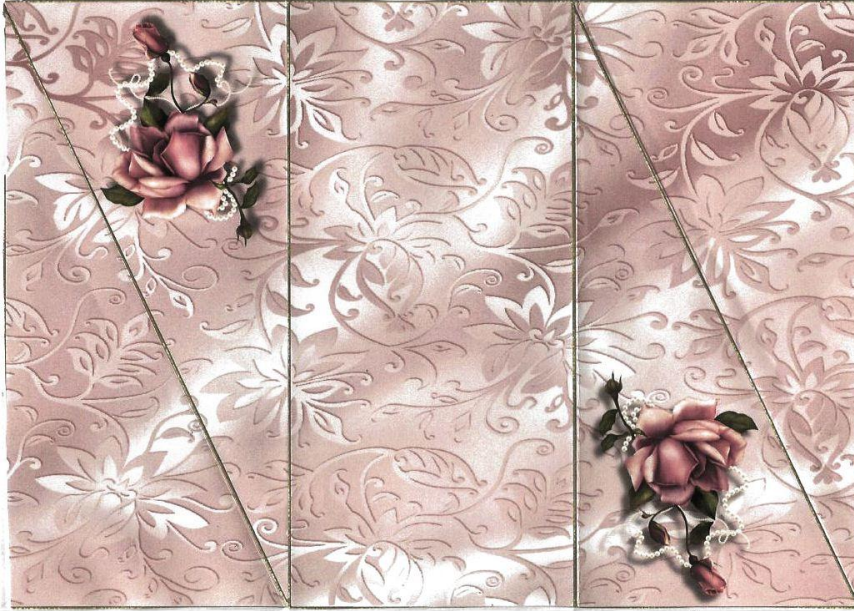

Closed Card Front
Pyramid layers not used in this example

Card partially opened

Card fully open/Insert

Card Back

I hope you have fun making up these Off-Set Gatefold Cards!
