

3D Cards in a Box

Before Cutting out score where marked on each of the sheets, lining up your ruler with the registration. Cut out all the sheets but Don't cut out the oval on sheet 1 yet.

Pre-crease all score lines using a bone folder.

Take your Box Front and turn over. Tape a small magnet with sellotape approx 1 cm in from the edge making sure it isn't within the oval on the reverse side.

Add double sided tape where shown in red on the photo

Turn over and adhere in place. I have marked in blue on the photo where your magnet is now sandwiched between the layers.

This strengthens the front of your box and secures your magnet in place

Cut out and remove the oval area

3D Cards in a Box

Place the front and back face down and line them up as shown in the photo. Add double sided tape onto the flap on the back of the box where shown in red on the photo

Lift the flap up and over and join the 2 pieces together.

Add double sided tape where shown in red on the photo but only remove the carrier sheet from the small flaps

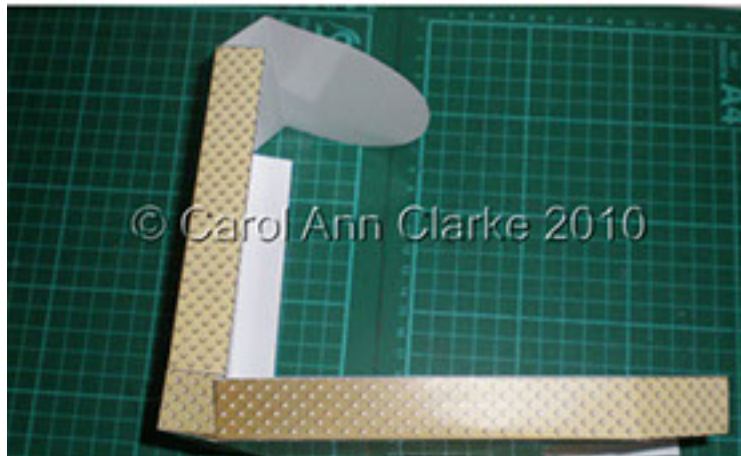

Lift up the back of the box

Adhere the flaps to the outside of the sides of the box to create the corners

3D Cards in a Box

Your box will now look like this from the side.

Remove the carrier tape from the double sided tape on sides of the box.

Fold the front over and adhere the sides in place

Take a 2nd magnet and allow it to stick to the 1st magnet hidden under the front flap.

Remove the magnet and place a small piece of sellotape adhesive side up in it's place

3D Cards in a Box

Add the magnet again, it will find the right place by itself!

Fold the box flap over and make sure it sticks to the sellotape.

Open the flap and your magnet will be adhered in exactly in the right place.

Add double sided tape or wet glue to the reverse of the Box under flap and care full slip into place and adhere. This will finish your box off with a pretty lining, strengthen the flap and hide the magnet.

3D Cards in a Box

Take a pair of mirror image butterflies and adhere a 3rd magnet in the middle of one. Adhere the 2nd butterfly in place on top using glue or double sided tape. If you don't want to use magnets sticky backed Velcro can be used instead and your butterfly can be adhered in place.

Bend the butterfly wings up and your butterfly will stick to the other magnets to hold it in place. This makes it removable and it can then be used as a fridge magnet. If you laminate the decoupage before cutting out this will make it more durable too.

Add further decoupage butterflies to decorate your box.

Your box will now look like this when opened.

I have decorated my butterfly body with pretty small crystals

3D Cards in a Box

Score, cut out and fold your cards and add the matching inserts. Add the decoupage butterflies. As these are separate you can choose where to add them.

To make a pretty matching gift tag print one of the insert sheets onto photo paper. Score and fold with the pattern on the outside. Add 2 of the decoupage butterflies and decorate with crystals

Make up the matching envelopes and the cards plus envelopes will fit into your box.

The box will fit approx 8 cards and envelopes. These make lovely gifts and are a great seller at Crafty Fayres etc

3D Cards in a Box

Your completed kit with box, cards, inserts, envelopes and gift tag, with removable fridge magnet too!
