

# 3D Rocking Basket Kits

Lovely 3D Baskets filled with flowers that will also rock. A gentle push will allow your card to rock. Your lovely card will fold flat for posting. The inside of the basket is viewed through a window on the front making a beautiful keepsake card

For best results print sheets 1 to 4 onto photo paper or good quality card-stock and sheets 5 & 6 onto good quality paper

## 3D Rocking Basket Kits

Before Cutting out score where marked on each of the sheets, lining up your ruler with the registration marks on sheets 1 and 4. Cut out all the sheets but Don't cut out sheet 1 yet

Before cutting out sheet 1 recommend that you laminate the front of the basket to a 2nd sheet of thin card to strengthen it but don't add it to the flap.

Cut out around the outer edge

Turn over fold down the flap and crease using a bone folder

Cut out and remove the window area

## 3D Rocking Basket Kits

Take the inner back from sheet 2 and align the front with the inner back. Hold in place (you could use paper clips to make sure they don't move)

Turn the 2 pieces over and add adhesive to the flap on the card front where marked in red on the photo

Fold the flap over to join the front to the inner back.

Add adhesive where shown in red on the photo

Take the outer back from sheet 3 and align the edges. Adhere in place.

Place to one side

## 3D Rocking Basket Kits

Take the card base from sheet 4

The following numbers refer to the numbers on the photos

1- Fold in half

2 - fold both the tops down

3 - to create a 'W' shape when viewed from the side

Add adhesive where shown in red on the photo

Take the card you made earlier and lift the front

Place the base adhesive side down towards the bottom of the inner front. Make sure you keep it in line with the bottom but approximately 1 cm up from the bottom.

## 3D Rocking Basket Kits

Fold the front down and turn over  
Using a pencil draw a line along  
the edge

I have drawn my lines in black so  
you can see where they are.

Cut approximately 1/2 cm inside  
the lines you drew

Your card will now look like this.

Add adhesive where shown in  
red on the photo

## 3D Rocking Basket Kits

Fold the front down making sure the front and back are aligned and the base stays folded and adhere to the adhesive you added in the last step

Your card will now look like this from the side

Cut out and add the decoupage using foam tape or silicone glue to give depth. I have included greetings and a few extra decoupage pieces in most of the kits and you can choose where to use them

The decoupage bows can be added to the handle but you might like to make up the envelope first to make sure your card will fit inside it before deciding where to place the bow

The bows are mirror images of each other and the 2nd can be added to the back, but they do need to be kept the same way up (I marked the backs of mine to make sure I had them both the same way up) Only adhere the very top of the bows and where they overlap the back to allow your card to open
