

## Majestic Floral Corner Stacker Card Toppers Tutorial

Tutorial by Mary Jane Harris 2013

1. Print out sheet onto your choice of cardstock or photo paper.

2. Next cut out all of the corner stacking pieces, and any other decoupage/layer pieces that you are planning to use to make your card. I always try to add extra decoupage pieces so that you have more flexibility when designing your project.
3. Layer the corner stacker pieces in the lower left corner of your topper. Starting with the largest piece down to the smallest of the three.
4. Add any other decorative pieces and/or sentiment tags that you so choose and your card topper is all ready to be made into a stunning card!
