

# Flowers & Butterfly Fancy Arch

## Shaped Pyramid Sheets

Cut out all the elements on the sheet

Adhere the base layer to a card blank. I made a 5.25 in sq card blank and left a small border but you could also use a 5 in sq card blank or even a larger one and matt and layer the design.

Add the pyramage layers using silicone or dimensionals, making sure you match the pattern. Start with the largest ...

... and end with the smallest layer to create your 3D effect.

There are greetings on the sheet too.

Matching insert sheets are also available.
