

Floral Butterfly Fancy Cross with Round Top Shaped Pyramid & Decoupage

Slightly smaller than A5 inch sized pyramid card topper with pretty flowers and butterfly on an ach metallic background with Fancy Cross. There are 3 shaped pyramage layers and 2 optional decoupage butterflies too.

For best results print sheets onto photo paper or good quality cardstock.

Floral Butterfly Fancy Cross with Round Top Shaped Pyramid & Decoupage

Cut out all the elements on the sheet

Adhere the base layer to an A5 card blank trimming the card blank to size if necessary. I left a small border but you could trim to the size of the topper or use an even a larger card blank and matt and layer the design

Add the pyramage layers using silicone or dimensionals, making sure you match the pattern. Start with the largest and end with the smallest layer to create your 3D effect.

The butterflies are optional and can be added last. I bent the wings to simulate flight. You could also use just the base layer and butterfly, or print the sheet more than once and decoupage in the traditional way to ring the changes.
