

# Snow Globe Card Tutorial

Print the sheet and gather materials.  
For this sheet I will make a shaped card.  
Scissors, dimensional foam dots, glue,  
double stick tape.

My cut outs and sentiment tag.  
A. Next you will need to score and  
fold a piece of card stock.  
B. Place the snow globe piece just  
over the edge of the fold and trace  
around it.

I am using purple so you can see it.  
You can use any color you like.  
C. Now remove the snow globe image  
and cut the shape out.  
D. Using ds tape or glue attach the snow  
globe to the card stock cut out, aligning  
it from the bottom. It should be just a  
little over the edge.

Add your decoupage elements and  
your sentiment tag to finish.
