

Aperture Gatefold Card Mini Kits

Instructions

designed by **Mary MacBean** exclusively for www.craftsuprint.com

Print the 2 sheets on to medium to heavy weight card or photo paper. Cut out all pieces

Score and mountain fold along the printed lines. This forms the main body of the card

Using double sided sticky tape or glue, attach the insert to the inside of the card, between the folded lines.

If you prefer to have no white showing, cover the inside fronts with a matching or toning paper, trimmed to fit. Alternatively, print out the main card a second time and use the front pieces as inside fronts.

Using sticky pads or silicone glue for extra dimension, build up the pyramage layers starting with the largest and building up to the smallest, ensuring that the design matches.

Attach the pyramage to the insert, aligning the design.

Finish the card by attaching a greeting using either the included sentiment or the blank tag with your own message.
