

Tutorial

Range of cascade Christmas and Birthday cards

These cards will fit a standard DL envelope and are easy but impressive, using just one A4 sheet

Print on a fairly thick paper, Crafty Bob's 250gsm paper should be ideal.

Score section A where the folds are indicated by dashed lines, and cut all around the outside edge, also cut out the smaller section B. Fold along the creases and then stick section B to the back of the centre of section A between the folds.

Fold the card flat, and that's it.

Score and fold where shown.

Stick the small panel to centre of the reverse side of main section.

Et voila! the finished card.

There are 11 cards currently in this range. More to come soon.
