

Square Layers Card Fronts

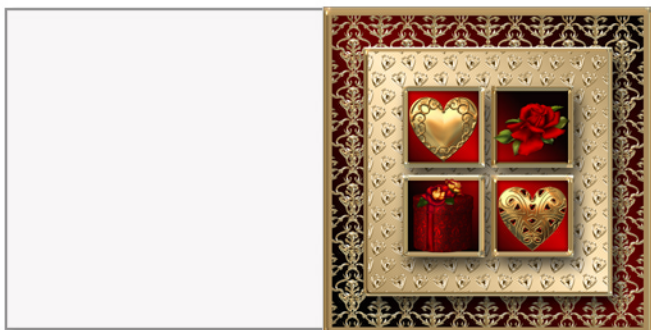

Instructions

designed by Mary MacBean exclusively for www.craftsuprint.com

A card blank at least 6 inches square is required for this design

Print the design sheet onto medium to heavy weight card or photo paper. Cut out all pieces

Using double sided sticky tape or glue, attach the card front to your blank card, lining up the edges.

Using sticky pads or silicone glue for extra dimension, attach the square layers to the front of the card. Start with the largest piece and then attach the smaller squares on top, ensuring that the design matches.

To finish the card attach either the included sentiment or use the blank tag for your own message.
