

5" x 7" Side Fold Pyramage Mini Kits

Instructions

designed by **Mary MacBean** exclusively for www.craftsuprint.com

Print the 2 sheets on to medium to heavy weight card or photo paper. Cut out all pieces

1. Score and mountain fold the tab on the card front along the printed line (i.e. fold away from you).

2. Using glue or double sided sticky tape, attach the folded tab on the front of the card to the underside of the inside back. The fold should be along the side of the inside back

3. Using glue or double sided sticky tape, attach the inside front to the card front, matching edges. There will be a slight gap at the fold. This is to allow the card to fold more easily.

4. Using glue or double sided sticky tape, attach the outside back to the card, covering the glued tab.

5. Using sticky pads or silicone glue for extra dimension, build up the pyramage layers starting with the largest and building up to the smallest, ensuring that the design matches.

6. Attach the pyramage to the inside of the card using silicone glue or sticky pads

Finish the card by attaching a greeting using either the included sentiment or the blank tag with your own message.
