

5 x 5 Double Flip Flop Tutorial

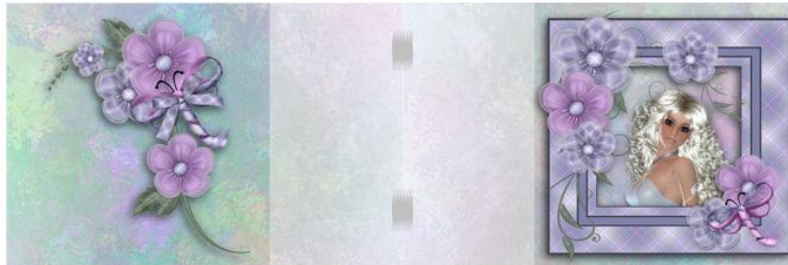

1. Print page 1, 2 and 3-D Elements on good quality cardstock. Flip pages 1 & 2 over front to back and print Backing Sheet on back side of pages.

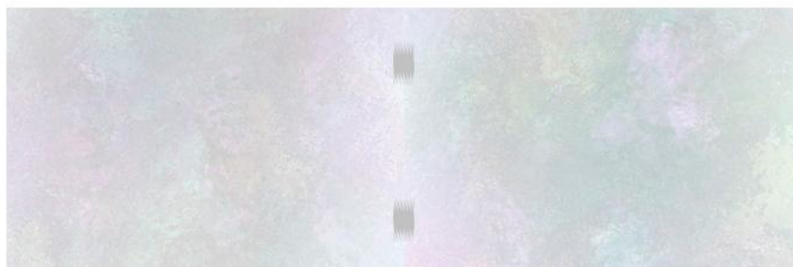

2. Score along division of color on all 4 panels on sheets 1 & 2 and cut out, making sure to keep the panels from each sheet together.

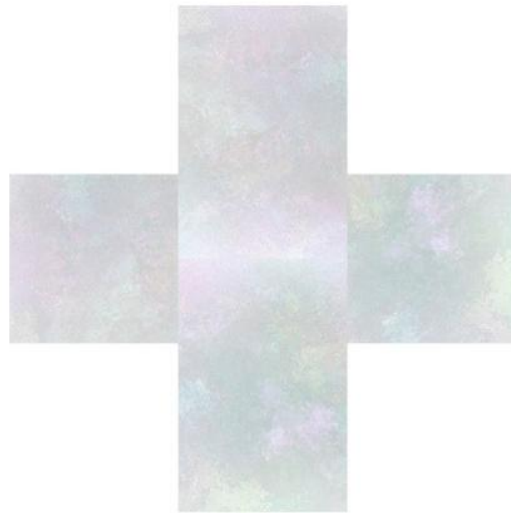

3. With a small amount of Clear Tape, tape panel A & B together on the FRONT side to hold together for Step 5.

4. With a small amount of Clear Tape, tape panel C & D together on the BACK side to hold together for Step 5.

5. With Decorative side Down, center panel A/B crosswise on panel C/D. Glue down with your choice of adhesive....glue stick, PVA glue or Double Sided Tape. (be sure to pay attention to orientation of the C/D panel, so when folded the Decorative panels are in correct position.)

6. With the panel that has the 3-D elements on the LEFT side, and facing DOWN, fold in this order: Bottom up, Right over, Top down, Left over.

7. Now, cut out your 3-D elements and layer with your chosen adhesive...Silicon Glue or Foam Pads.

8. Add Sentiment Tag on any of the panels you wish or multiple panels.
